RE: RESULTS OF THE FY 2015/16 INTEGRATED FINANCIAL SUSTAINABILITY ANALYSIS

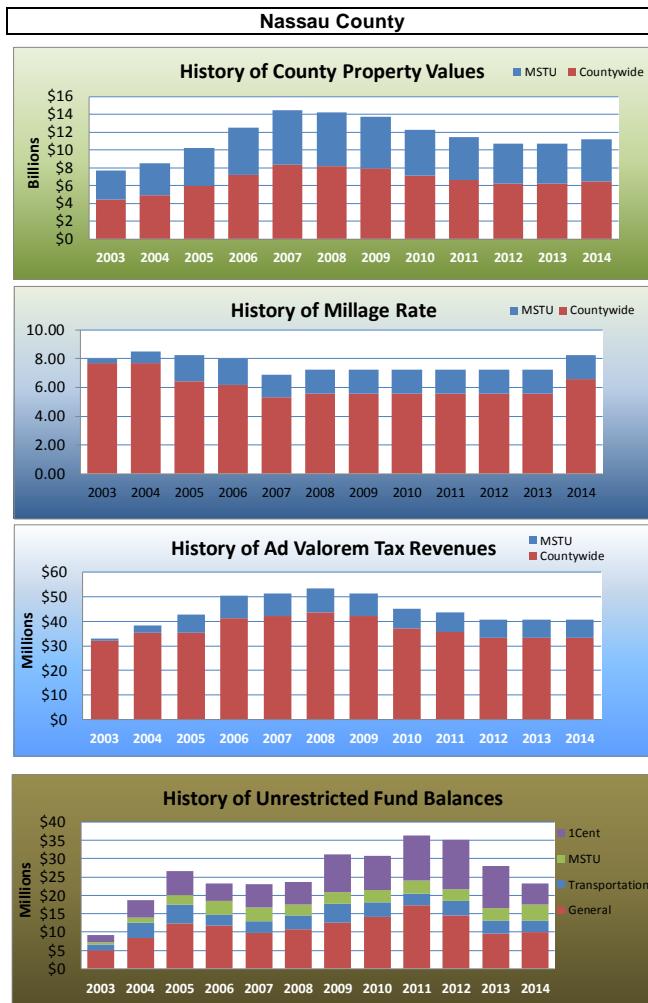

INTRODUCTION: Burton & Associates has completed an analysis for Nassau County, Florida (the County) in which we evaluated the current and projected financial condition of the County's General, Transportation, MSTU and One-Cent Sales Tax funds. In addition to the individual fund evaluations, we also analyzed the funds on a combined basis to evaluate the sustainability of the cash flows of each fund individually and combined. We facilitated the decision support process by use of our proprietary FAMS-GF© model in live interactive work sessions with County staff and the County Commission.

A. BACKGROUND

The national economic and real estate market collapse that began in 2008 started a precipitous drop in property values throughout the Nation and the State, causing a parallel precipitous drop in ad valorem tax revenue to most local governments. Therefore, many local governments in Florida were faced with a fiscal crisis in the years following the recession.

Since 2008 this continuing fiscal crisis has caused many local governments to fund annual budget shortfalls with either cash reserves that were built up prior to 2008 or by delaying needed capital projects that would otherwise adequately maintain infrastructure such as roads, parks, etc. Now, many fiscal managers are realizing that those reserves will be exhausted in a few years. During this same time, costs have continued to increase and revenues have continued to decline and are just now showing signs of improvement.

The crisis is real and unprecedented and is demonstrated in the following graphs that show the history of property values, millage rates, ad valorem revenues and unrestricted fund balances in Nassau County from 2003 through 2014.

The above graphs reveal that from 2008 through 2013, ad valorem revenues declined significantly in response to the precipitous decline in property values. The County has reacted to this decline by raising the millage in FY 2014/2015. However, the unrestricted reserves continue to be used to fund deficit spending and corrective actions must be taken to maintain a healthy reserve balance.

B. ANALYSIS

This section presents a summary of the analysis conducted during the Study. Detailed schedules of the data, assumptions and projections are shown in the Appendices.

Funds Evaluated

The basis of the analysis was the projection of the four primary taxing funds within the County:

1. General Fund – The General Fund receives the majority of revenues from Ad Valorem taxes generated by property values and the General County Millage. The General Fund contains the costs for Constitutional Officers, Libraries, Rescue, all Administrative Departments, Parks & Recreation, and Facilities Maintenance.

2. County Transportation Fund – The primary revenue sources for this fund is Ad Valorem tax revenue generated by an allocated Transportation Millage rate, as well as intergovernmental revenues, transfers and other miscellaneous revenues. This fund is restricted to Transportation related expenditures only.
3. Municipal Service Fund (MSTU) – This fund receives additional ad valorem tax revenue from the unincorporated area generated by the MSTU millage rate, as well as intergovernmental revenues, transfers and other miscellaneous revenues. The MSTU funds Animal Services, Planning & Economic Opportunity, Fire Department, Code Enforcement and a portion of Sheriff Patrol.
4. One-Cent Sales Tax Fund – The primary revenue source for this fund is the one-cent sales tax within the County. This fund may provide funds for any governmental purpose except to pay debt.

In accordance with Governmental Accounting Standards Board (GASB), each fund is accounted for separately; however, many financial decisions are made based upon the combined financial performance and available reserves of all funds together. Therefore, while each fund was evaluated individually in order to analyze the sustainability of the cash flows of each fund on a structurally balanced basis, we also evaluated all four funds on a consolidated cash flow basis.

Base Data & Assumptions

The analysis was performed using the most current historical and projected information available for the County. The primary data sources and assumptions for the analysis are as follows:

Beginning Fund Balances –The FY 2013/2014 Consolidated Annual Financial Report (CAFR) was used to establish the beginning FY 2014/2015 balances for each fund.

Reserve for Minimum Fund Balance – Pursuant to the County's adopted financial policies, a minimum reserve balance target of 2 months Operations & Maintenance (O&M) expenditures and required transfers has been established for each fund with the exception of the One-Cent fund.

Revenues – The revenues for each fund consist of taxes, intergovernmental sources, charges for services, licenses and permits, fines and forfeits, inter-fund transfers and other miscellaneous revenues. The FY 2015/2016 ad valorem tax revenue is based upon the preliminary 2015 property valuations from the County Property Appraiser, and adjusted annually to reflect existing property value adjustments as well as new construction. All other revenues were based upon the FY 2015/2016 Proposed Budget and escalated annually based upon discussions with County staff.

Inter-fund Transfers – The General, Transportation and MSTU funds all currently rely on subsidy from the One-Cent Sales Tax fund to provide funding for ongoing operations, renewal & replacement and capital improvements. To the extent that funds are available from the One-

Cent fund, transfers were made to each fund to maintain the reserve for minimum fund balance after all expenditures are accounted for in the individual funds.

Taxable Property Value Projections – County-wide projected growth in taxable property valuations were estimated to grow 5% annually from their current level. An analysis of property valuations in the MSTU service area was conducted to correlate the County-wide property adjustment to the MSTU values. Property valuation estimates from State sources were evaluated, however, during discussions with the County Commission it was determined that a more conservative yet reasonable estimate of 5% average annual adjustment would be used as the baseline projection. It should be noted that the analysis was set up to evaluate recessionary and higher growth scenarios.

Population Growth – Certain revenues such as one-cent sales tax revenues were projected based upon the projection of population within the County. The projection of population growth was obtained from the Florida Office of Economic Development and Research.

Operating Expenditures – The operating expenditures are based upon the FY 2014/2015 year-end estimates and the FY 2015/2016 Proposed Budget, and include all operating and maintenance expenditures, debt service requirements, inter-fund transfers, and operating capital. After FY 2015/2016, expenditures were projected based upon assumed cost escalation factors for individual expense categories, with the exception of debt service expenses, which reflect the required repayment schedules for each respective financing. In addition, inter-fund transfers from the One-Cent Fund were calculated in each year to provide necessary support for operations and required fund balances.

Full Time Equivalent Hiring – County staff and Constitutional Officers had provided projections of requested FTE hiring by each individual County office. However, based upon discussions with County staff and consensus by the Commission, projected FTE hiring has been limited in the analysis to correlate with the projection of population growth within the County. This would in effect serve to maintain the existing level of service the County provides to their constituents on a per capita basis.

Cost Escalation – Annual cost escalation factors for the various types of operating and maintenance expenditures were provided by County staff and applied in each year of the projection period beginning in FY 2016.

Capital Improvements –The County has identified four individual groups of Capital Improvements:

- CIP - the Capital Improvement Plan (CIP) that was agreed to by the County Commission on June 9, 2015 and has been identified to be funded by available cash flows and reserves in the system. The CIP contains specific timing and costs for individual projects throughout the projection period. It should be noted that the County wishes to evaluate the CIP on a cash funded basis; therefore, no assumptions were made for the issuance of debt to fund the CIP.

- Unfunded Capital Needs – due to lack of available funding sources, these projects have not received consensus or approval by the Commission, but have been identified with specific timing and costs by County departments and discussed in Commission meetings. Certain projects in the unfunded category have matching funds from State sources.
- Fleet Replacement Program - funds ongoing vehicle replacement throughout the projection period.
- Pavement Management Program - a plan to continually renew and maintain County roads in need of pavement improvements. Based on an engineering study conducted in 2011; \$7.5 million per year would be needed to bring County Roads up to a “satisfactory” standard. Given the lack of financial resources, the County has never been able to dedicate more than \$1.5 million annually. Therefore, our model used \$1.5 million beginning in FY 2015/2016 and then assumed an inflation rate of 5% per year for the remaining projection period.

The table below presents all capital projects as projected within the analysis. The project schedules are presented in the Appendices.

	FY 15/16	FY 16/17	FY 17/18	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25	10-Year Total
CIP	\$8,958,168	\$3,641,080	\$266,614	\$424,400	\$123,348	\$0	\$0	\$0	\$0	\$0	\$13,413,610
Unfunded Capital Needs	\$8,079,840	\$12,709,394	\$6,479,866	\$4,926,966	\$8,384,202	\$9,218,952	\$11,614,690	\$8,387,700	\$8,555,600	\$9,141,750	\$87,498,959
Fleet Replacement Program	\$2,417,188	\$1,762,100	\$2,919,000	\$1,757,900	\$2,090,500	\$2,092,290	\$2,173,163	\$2,132,492	\$2,194,224	\$2,073,428	\$21,612,285

Total Capital Improvements:	\$20,955,196	\$19,687,574	\$11,319,280	\$8,845,766	\$12,421,450	\$13,225,812	\$15,798,151	\$12,631,005	\$12,966,178	\$13,542,350	\$141,392,761

C. RESULTS

Current and Projected Financial Condition

The status-quo (current practices) projection of each fund reveals that the General, Transportation and MSTU funds are not structurally balanced (expenditures exceed revenues) and must continue to rely on significant transfers in from the One-Cent Fund to provide payment for ongoing operations and capital. Without the continued subsidy from the One-Cent fund, each individual fund would need reductions to recurring costs or additional revenues to be sustainable and structurally balanced.

The County has also requested that all four funds be evaluated as a whole. This is accomplished by consolidating each fund's revenues, expenditures, and fund balance (combined fund). The combined fund analysis reveals that the County will be unable to sustain ongoing operations without reducing the reserve for minimum fund balance requirement, or achieve other solutions for sustainability. Additionally, the County will not be able to fund any capital improvements beyond the currently adopted CIP and the Fleet Replacement Program. Without systematic investment in capital projects, assets will deteriorate and costs will increase. Short of a change to the County's current funding structure, the County will only be able to fund approximately 25% of the County's identified capital needs over the 10-year projection period as depicted in the following table:

	FY 15/16	FY 16/17	FY 17/18	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25	10-Year Total
CIP	\$8,958,168	\$3,641,080	\$266,614	\$424,400	\$123,348	\$0	\$0	\$0	\$0	\$0	\$13,413,610
Unfunded Capital Needs	\$8,079,840	\$12,709,394	\$6,479,866	\$4,926,966	\$8,384,202	\$9,218,952	\$11,614,690	\$8,387,700	\$8,555,600	\$9,141,750	\$87,498,959
Fleet Replacement Program	\$2,417,188	\$1,762,100	\$2,919,000	\$1,757,900	\$2,090,500	\$2,092,290	\$2,173,163	\$2,132,492	\$2,194,224	\$2,073,428	\$21,612,285
Pavement Management Program	\$1,500,000	\$1,575,000	\$1,653,800	\$1,736,500	\$1,823,400	\$1,914,570	\$2,010,299	\$2,110,813	\$2,216,354	\$2,327,172	\$18,867,908
Total Capital Improvements:	\$20,955,196	\$19,687,574	\$11,319,280	\$8,845,766	\$12,421,450	\$13,225,812	\$15,798,151	\$12,631,005	\$12,966,178	\$13,542,350	\$141,392,761
Total Available Funds for CIP	\$18,127,252	\$4,385,567	\$1,499,892	\$3,083,683	\$3,275,373	\$3,226,410	\$543,291	\$533,123	\$548,556	\$0	\$35,223,147
% of Total CIP	87%	22%	13%	35%	26%	24%	3%	4%	4%	0%	25%

The County's current financial model is not sustainable. Alternative financial strategies should be considered to ensure proper renewal and replacement of current assets, availability of cash reserves to mitigate against risk and strategic planning to ensure sufficient service levels can be provided for current residents and future development.

D. Potential Solutions

We recommend that the County consider the following possible solutions to achieve financial sustainability:

- Enhance Ad Valorem Revenues

To structurally balance the General, County Transportation and Municipal Service Funds, an approximate 1.35 Mil increase is needed. As a result, one-cent revenues, currently being used to cover operating deficits, could be solely used to meet identified capital improvements; as originally intended. The percentage of funded capital needs being met would increase from 25% funded to 100% funded over the ten year projection period.

- Alternative Financing for Capital Projects

The County could potentially use debt funding to finance long-lived assets in the CIP. Leveraging debt would lower the cash funded burden of the CIP in any given year. The County currently maintains very low levels of debt and would not be over-burdened with debt covenants if additional debt financing was explored.

- Adoption of Special Assessments

Although special assessment alternatives were not discussed at length during our presentations, there was discussion of a possible fire Municipal Service Benefit Unit (MSBU) being established. Special assessment by definition is not a tax, but a charge for a derived benefit being provided to a parcel of land. Revenue derived would be restricted to the purpose of creation, but consideration of any assessments that could legally be adopted would more equitably spread costs among property owners and free up cash to meet future operational and capital expenditures.

- Reduced Operations & Maintenance Costs

The County could reduce recurring operations and maintenance expenditures by approximately \$9.5 million annually. However, reductions in O&M expenditures should be carefully considered in relation to reduced service levels.

- Combined Strategy

A strategy could be developed to include a combination of a millage increase, some debt funding of capital projects, adoption of special assessment(s) and recurring operations & maintenance cost reductions.

E. Recommendation

We recommend that the County consider the potential solutions noted above to develop a long-term strategy that results in the County becoming financially sustainable. Such strategy should prioritize capital expenditures, explore cost reductions, consider revenue enhancements and alternative debt financing where appropriate.

In addition, we recommend that the County perform an annual review/update of this financial sustainability analysis to ensure that as events actually occur, the plan can be adjusted as necessary to continue to provide sufficient revenues to meet the County's needs and to maintain acceptable levels of reserves and acceptable levels of service.

If you have any question or would like to discuss this Technical Memorandum, please do not hesitate to call me at (904) 247-0787.

Sincerely,

Michael E. Burton
President
